Certificate of the Exporter to Hong Kong

This is to certify that the exporting company specified below has complied with the requirement of Hong Kong import control measures on Japanese food with regard to radiological protection and that all the products exported to Hong Kong by the company are readily available for sale in Japan and therefore safe for human consumption as far as radiological protection of food consumers is concerned.

This certificate would become invalid should any other incident or risk of contamination occur in Japan or any incompliance of the company be found in the future. The Japanese authorities would notify the Hong Kong authorities should the certificate become invalid.
