<b>Heading</b>	Media report - French Health Authority had ordered Nestles in France to destroy all Perrier production between 10 March and 14 March 2024 from one of its seven water extraction sites in southern France due to suspected contamination.
<b>The incident</b>	Media reported the French Health authority had ordered Nestle in France to destroy all Perrier production from 10 to 14 March 2024 from one of its seven water extraction sites in southern France due to suspected contamination from fecal origin (coliforms, Escherichia coli) and Pseudomonas aeruginosa. According to Nestlé, this situation is the consequence of heavy rainfall during storm Monica, which hit the region in March 2024.
<b>Position of CFS</b>	<ul style="list-style-type: none"><li>• Information on product distribution outside France is not available at the time. CFS is investigating whether the affected batch has been imported to Hong Kong.
