(*) ( following MRLs or EMRLs) :	At or about the limit of determination.
F (following MRLs or EMRLs for milks) :	<p>Codex MRLs/EMRLs for fat-soluble pesticide residues in milk and milk products are expressed on a whole product basis.</p> <p>For a "milk product" with a fat content less than 2%, the MRL applied should be half those specified for milk. The MRL for "milk products" with a fat content of 2% or more should be 25 times the maximum residue limit specified for milk, expressed on a fat basis.</p> <p>Fat soluble pesticide residues to which the above general provision applies are indicated with the letter "F" in conjunction with the MRL specified for milk. However, in case of an MRL or EMRL set at or about the limit of determination, the letter "F" is not used.</p>
(fat) (following MRLs or EMRLs for meat) :	The MRL applies to the fat of the meat.
Po (following MRLs) :	The MRL accommodates post-harvest treatment of the commodity
PoP (following MRLs for processed foods (Classes D and E in the Codex Classification)):	The MRL accommodates post-harvest treatment of the primary food commodity.
